Founders of Sri Chaitanya Educational Institutions: Dr. B.S.Rao and Dr. B.Jhansi Lakshmi Bai

# Path-breaking EDUCATION!

Incepted in 1986, as a Junior College in Vijayawada, Sri Chaitanya swiftly emerged as a trendsetter with its students outshining in almost all national and international level competitive exams. Over the years, the institute has fulfilled the dreams of millions of students, who have been aspiring to become IITians, Doctors, IAS Officers, Chartered Accountants and others.

Sri Chaitanya's fast-paced growth is a result of micro-teaching which efficiently streamlined corporate schooling system. This time-tested and result-driven education has enabled to produce lakhs of Engineers and thousands of Doctors. Sri Chaitanya, considered to be the pioneer of education for imbibing micro-teaching mechanism, influenced the entire schooling landscape.

## The Dynamic Directors Setting New Benchmarks of Excellence

# New-age **LEARNING** Future-ready **STUDENTS**

Equipped with a clear vision, knowledge and expertise, Sri Chaitanya Educational Institutions now takes a step back from the routine teaching to introduce 'Future Pathways - The new generation global schools', offering state-of-the-art learning ambience to professionally groom students into inspiring new-age leaders in a variety of spheres.

Future Pathways is mapped to CBSE/IGCSE syllabus. Contemporary teaching. New methodologies. Inspiring environment. All aimed at changing the students into independent thinkers, innovators, entrepreneurs, scientists, IITians, doctors and others. Stepping beyond conventional schooling, students are encouraged to broaden minds, nurture creativity, and take up new challenges to transform into intelligent, future-ready students with global level excellence!

---

Spearheaded by   
**NEXT GENERATION**  
Leaders!

Dr. B.S Rao, the founder and chairman, ensured our traditional values along with innovative educational system catapult the school to new heights. Owned and managed by his next generation, the school continues to retain its holistic heritage, while offering best-in-class, forward looking educational environment for students to become star performers on global platforms!

The passion for education has been passed on from one generation to the other and is today deeply rooted in the DNA of the school. On its journey of success, Sri Chaitanya's corporate philosophy hasn't changed a bit - which is to transform students into top-notch engineers, doctors and other professionals by scores of thousands. The school's consistent top results are a testimony to the fact!

# Technology-aided **21<sup>st</sup> CENTURY** Learning!

Today, learning has transformed hugely. Hybrid education to technology-driven learning to in-focus skills to out-of-the-box thinking, the needs of students are rapidly changing. In fact, education itself has taken a giant leap swiftly adapting to progressive technologies. Sri Chaitanya's FUTURE PATHWAYS has evolved to become a world leader in this future-focused education.

Based on the educational research derived from our schools as well as challenges and opportunities faced by young students in the rapidly changing world, the program has evolved to make the students global achievers. No two students are the same. Though no one can predict the future, in a world increasingly driven by technological advances, it is critical that students' inherent skills such as creativity, intuition and interpersonal skills are nurtured. Future Pathways combines the characteristics of advancement of technology along with the most advanced learning environments and commits to innovate in order to define a new era of education.

Future  
**SKILLS**  
For Tomorrow's  
**CHALLENGES!**

Tomorrow's in-demand skills are dynamic. Empowering students with skills that propel them to success and stardom are critical for achievement. Future Pathways is the way forward for your child to learn skills, interests and hobbies that seamlessly align with his/her future career goals. Future Pathways has uncompromising quality standards and works alongside reputed and accredited bodies to ensure international compliance with educational requirements and guidelines while providing ongoing, independent audits of the school system.

# Redesigned **CURRICULUM** Redefined **GOALS**

The re-engineered curriculum moulds students into global achievers. Actually, Future Pathways is all about transforming students into 21st century leaders. For this purpose, Future Pathways offers exclusively structured 6 pathways - enabling students to pursue careers of their own choice. These include CRUX, COMPANION, ENRICHMENT, PREPARATORY, LEADERSHIP AND PROFICIENCY. These pathways create the right ambience for students to develop into well-rounded individuals with focused goals.

“ An academic engagement of global standards is essential for students to thrive as successful individuals. Our programs are designed to empower students with requisite skills and knowledge, while a professional faculty reinforces positive attributes among students. The curricula are crafted to offer diverse platforms for children to discover their inherent potential and harness their talents completely. Eventually, these students-centric programs would not only bring out the best, but propel students to global levels of competence. ”

*Mrs. Seema Boppana, Academic Director*

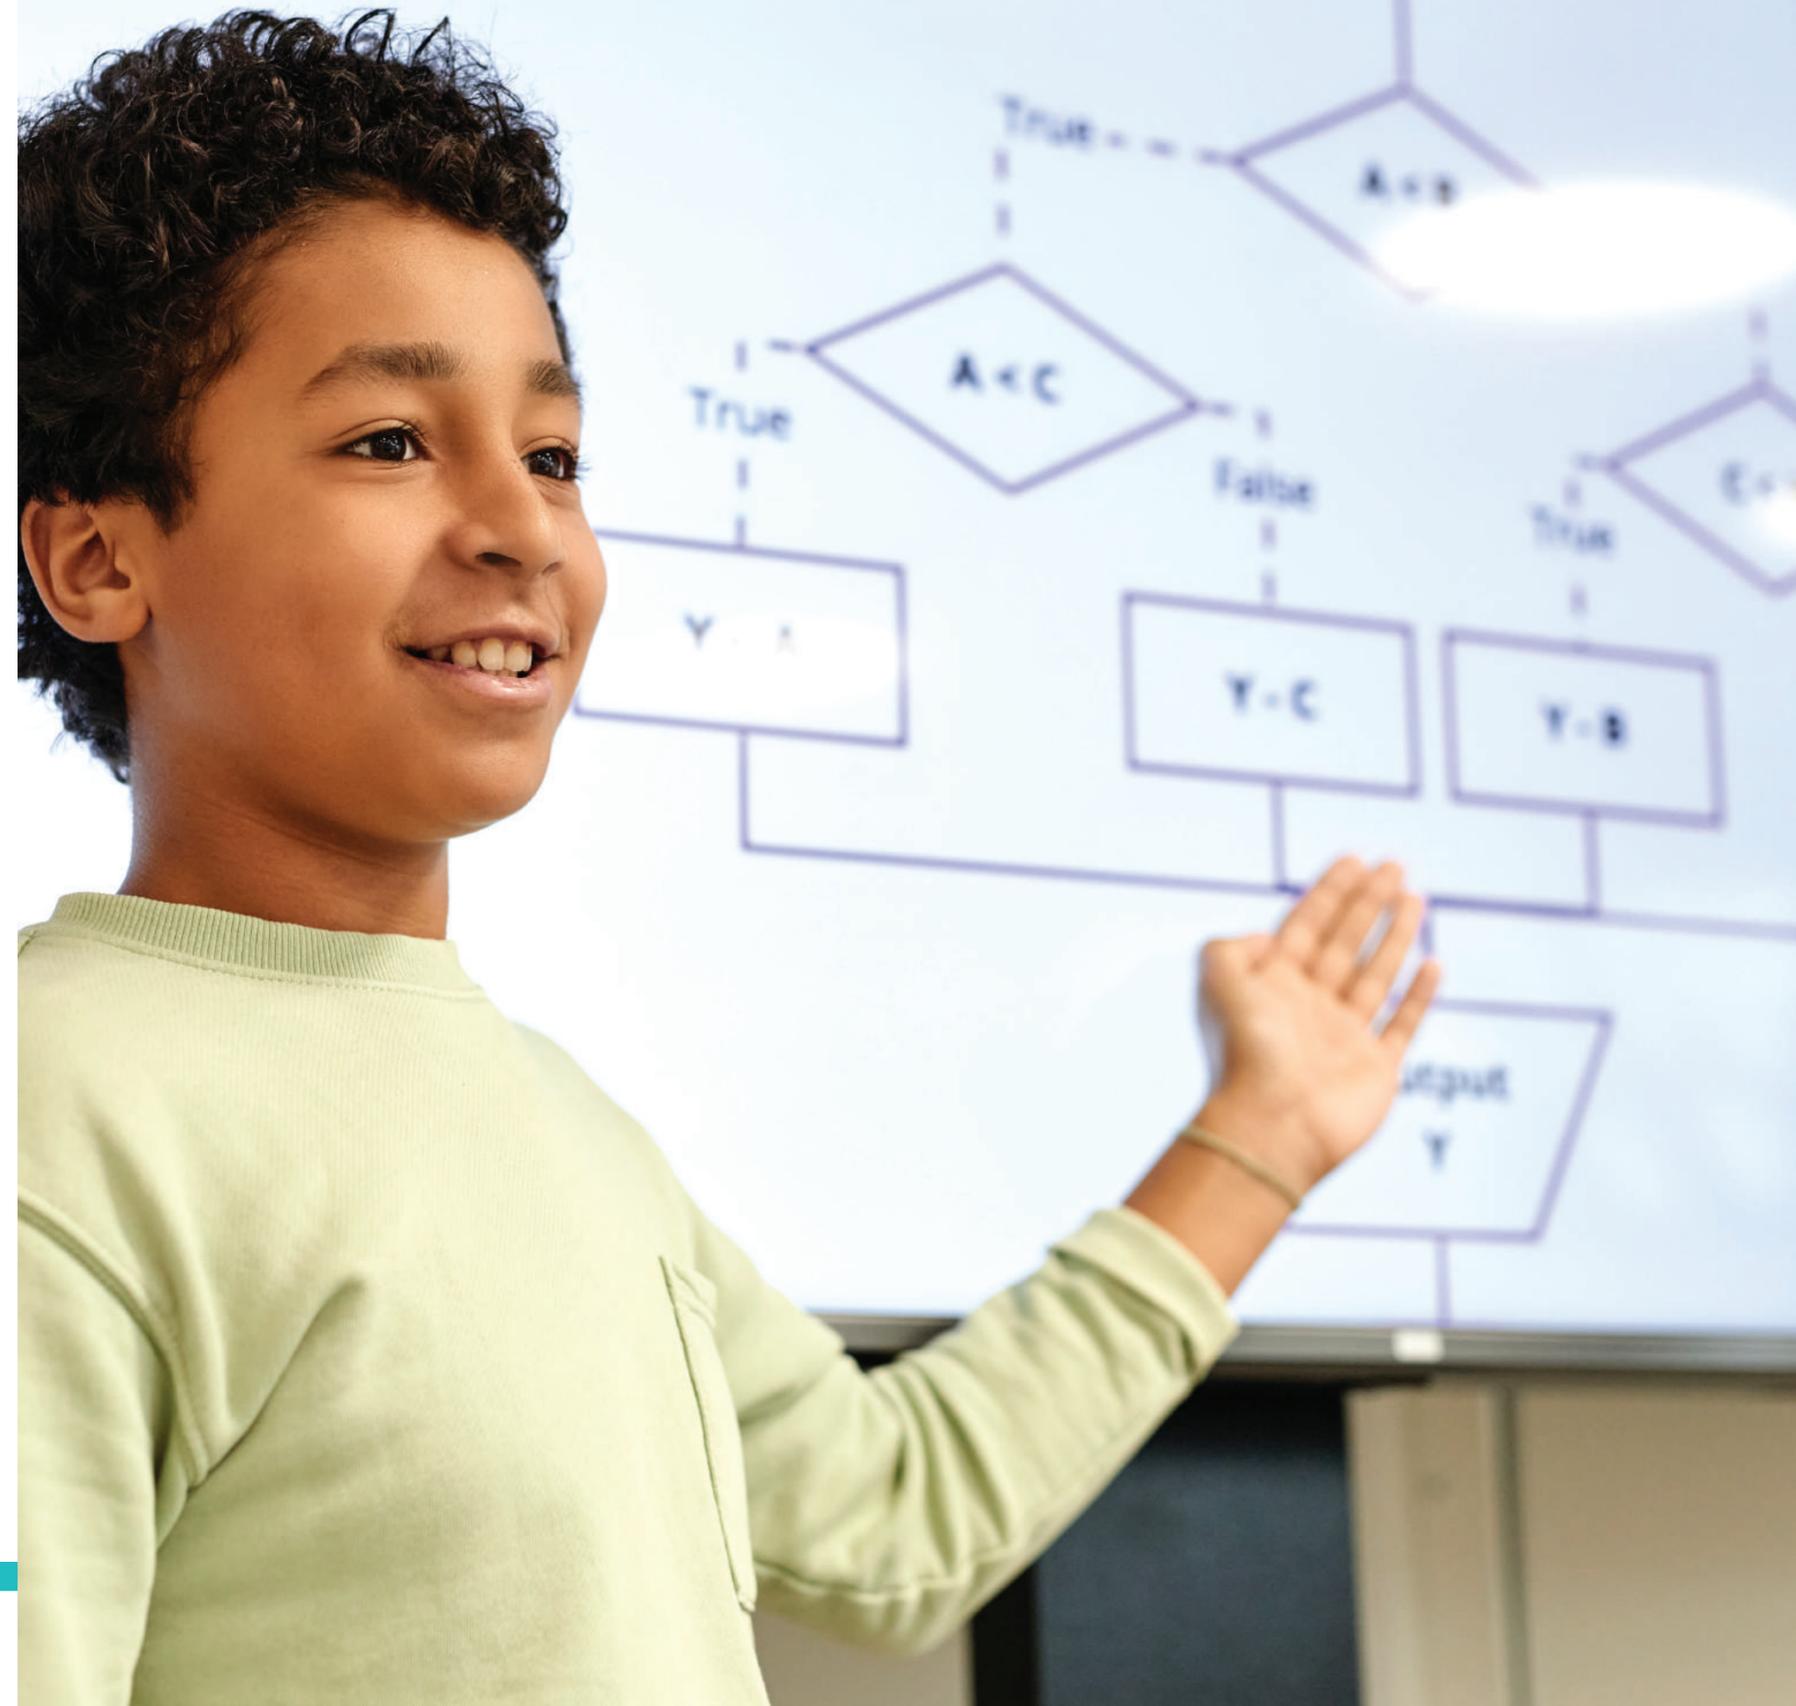

## Programs of **FUTURE PATHWAYS**

Gateway to  
**GREAT CAREERS**

# Integrating Core Concepts The **CRUX** **PATHWAY**

Adapting to the modernized techniques and skills requires the inclusion of subjects like Design Thinking, STEAM, Robotics and Coding which are integral part of CRUX along with regular subjects like Science, Mathematics, Social Studies and Languages.

---

# Fostering Passion

## The **COMPANION** **PATHWAY**

Electives offered in the Companion Pathway promote learning beyond regular subjects. The student gets to sneak a peek into the real world by exploring subjects like Entrepreneurship, Trade Field Studies, Financial Literacy and Photojournalism.

# Promoting Potential

## The **ENRICHMENT** **PATHWAY**

Looking at an object from all its sides will give the student a better understanding of the object. The enrichment clubs pave a way for the student to look at the same content through different lenses. The enrichment clubs aim at nurturing the students' dynamic collection of skills and talents by prompting them to work on their problem solving skills in topics from Oceanography, Astronomy, Epic Literature, Judiciary, Archaeology, Space Sciences, Linguistic and Mathematical Education.

---

# Strategic Approach The **PREPARATORY** **PATHWAY**

Many students aspire to attempt various competitive exams, Future Pathways promises to get the students ready for these exams with the help of the Preparatory Pathway program. It lays a strong foundation for mastering in competitive exams like NTSE, Olympiads, NDA, CLAT, CPT, SAT, AP and others. Coaching for entrance exams since the early age makes students achieve their end-goals more effectively. Keeping this in mind, we have attempted to evolve the most effective learning processes from the primary grades itself.

# Challenging Inhibitions

## The **LEADERSHIP** **PATHWAY**

A true leader is someone who is capable of being an inspiration. In the near future, half the distinguished population will have its roots firmly planted in technical knowledge and skills; while the other half will have interpersonal skills like no other. Like the mind and heart rule over our body, these two halves will have to work in perfect sync, which would be the role of a leader. The Leadership Pathway aims at developing the students' social, emotional and physical skills to mould them into future leaders who have sound technical knowledge with great interpersonal skills, through competitions, student-exchange programs and TED talks.

---

# Mastering Capabilities

## The **PROFICIENCY** **PATHWAY**

Supporting the students to gain a wide and clear perspective of the career opportunities that are in front of them is the aim of Proficiency Pathway. It imparts a solution that identifies, explores and prepares students to understand and establish their right path. It provides opportunities to meet experts from different fields who can offer a wealth of experience which facilitate students to make striking decisions for their futures.

Placing students on the winning path 

**FUTURE  
PATHWAYS**
